Creativity is inventing, experimenting, growing, taking risks, breaking rules, making mistakes, and having fun.

(Mary Lou Cook)

Our story begins in Tuscany in 1921, when FERRUCCIO FERRINI opened his artisan workshop in the heart of Tuscany, a land of art and culture, dedicating himself to the production of modern furniture for the home. In the 1960s he was joined by his son Bruno who, in collaboration with the masters of the Art Institute of Cascina, specialized in the creation of interior furnishings. When joined by Ferruccio's grandson Franco, at the beginning of the 90s, the artisan carpentry workshop was transformed into a dynamic company and with the purchase of new machinery, the entire production system was updated.

In 2007, despite the first signs of the world's biggest economic crisis, with the audacity and courage that had always distinguished him, Franco founded EUROPROGET, laying the foundations of the current FERRINI SrI (limited company), a company which today combines craftsmanship and innovation to design and build custom-made furnishings for commercial activities, exhibition structures, fairs and events.

OUR SERVICES

During the production process customer expectations are translated into business objectives.

1. MEETING

We listen to our customers' needs, share our ideas with them and create a relationship of trust.

2. FEASEBILITY

- analysis and development
- research of materials
- graphic project
- sharing with the customer
- cost estimate

In this phase, one or more solutions are developed to be presented to the customer with two-dimensional proposals and 3D models. Creativity, knowing how to compare and interpret materials and production techniques, is the basis for developing a competitive proposal. Each project is overseen by a dedicated project manager.

3. EXECUTIVE PHASE

- site inspection
- description of technical details,
- sampling preparation
- executive drawings
- chrono program
- relations with local councils and venue administration

Our technical office translates the graphic project into construction drawings, in synergy with the workers involved. For the optimization of the production process, we contact the venue administration and/ or the local council, to support the customer in carrying out paperwork and official processes.

4. REALIZATION

- planning of production phases
- assembly
- quality check

Our production structure is divided into carpentry and metalwork; it also makes use of a network of companies selected over the years. FERRINI Srl with its team follows every step of production ensuring the quality of the components and processes.

5. ASSEMBLY

- Sub-contractor coordination
- assembly of structures
- control and verification
- delivery

Our professionals, all specialists are directed by the project manager who ensures that everything complies with the client's expectations.

6. LOGISTICS

- packaging
- transport
- storage

In our warehouse, every single component is carefully packaged in accordance with the regulations in force in the country of destination. The packed materials are loaded on 4 our vehicles or on dedicated vehicles, to guarantee the quality of transport and punctuality of delivery. In the case of temporary installations, once disassembled, the components are stored in our warehouse where they are restored to ensure perfect conservation.

Ferrini Srl creatively integrates craftsmanship and new technologies, enhancing the insights and talents of a team always at the customer service.

We want your stand to be an excellent advertisement for your business.
